COURSEWORK

UNDERGRADUATE
Algorithms and Data Structures
Operating Systems
Computer Networks
Data Base Management System

SKILLS

PROGRAMMING
C++ • C
WEB DEVELOPMENT
NodeJS • Django • Jquery
ExpressJS • PHP • HTML • CSS
TOOLS AND DATABASES
MongoDB • MySQL • PostgreSQL
Git
FAMILIAR
AWS • Docker

AWARDS

• 2018 - Qualified for a Standard Laptop in the AIEESE-2018(primary)
• 2013 - Secured 5th Rank out of 200+ participants in Hercules BSA Cycle Quiz

EXPERIENCE

NAVRITI | SOFTWARE ENGINEERING INTERN
Sept 2020 - April 2021 | New Delhi, IN
- Developed a device monitoring system from which Admin can **monitor all the system and servers** connected to Navriti.
- Built using **Django Framework** for backend with **.NET console application** running as windows service to connect windows machine with server through socket and run scripts commanded remotely.
- **Powershell script runs through task scheduler** in windows to ping server about status of windows system.
- Major feature includes connecting any system remotely through **socket/django Channels** and run script to turn off, Disk cleanup, Restart, System Update, Delete Temporary Memories, etc.

OIR, NIT, TRICHY | WEB TEAM OF OIR
Sep 2020 - May 2021
- OIR is Office of International Relations, NIT TRICHY.
- Web Development Team is responsible for maintaining the OIR's website.
- As part of Web Team, Developed a portal where professors can host project ideas and students can propose to complete the project with professor in given time duration.

PROJECTS

VIDEO MEETUP | A VIDEO CONFERENCING WEB APPLICATION
Aug 2021 | https://github.com/tanweeralii/video-Meetup
- Built a web application that makes it easy to meet people with **video conferencing**.
- Used **Node.js** as backend web application with **PeerJS** and **Socket.io** for video calling.
- Whenever a new user visits, it creates a unique URL which actually represents a room, users can share the link with friends, at one time **maximum 2 people** can enter one room at one time
- Features included live chat.

SYNCHLY | DELTA WINTER OF CODE 2020
Dec 2020 - Feb 2021 | https://github.com/hariprasanths/synchly
- Synchly is an open source tool to **Automate database backups** with customizable recurring schedules.
- Added **PostgreSQL**, **MondoDB** Database Support.
- In context of cloud backup, added support for **AWS S3**.

CONTAINER-MANAGER | DOCKER'S MANAGER
March 2020 | https://github.com/tanweeralii/Container-Manager
- A **NodeJS** Web app to **manage Docker's Container** like stop, start, restart containers, etc.
- User can also list Available Images, List all containers and List running containers present in host's system.
- **Jquery Terminal** is used to create **web terminals** where users can execute bash commands directly inside running containers and also get the response.
- **Upload files** upto 200MB inside running container at any location from web application.
